ant's Council of	u bivarcar ranna	a 1255
STATINTL	Dr. Tietjen	- C/MS - O-DD/P - O-DD/I - O-DD/S
		OCC Dir/Comptroller
		C/CD/MS C/CD/MS
		and describing to Mr.

- 2. Dr. Tietjen opened the meeting by describing to Mr. Swengros the general area of interest of each official present, end then invited Mr. Sugmeros to speak.
- Suengros to speak.

  3. Mr. Swengros outlined the history of the council dating back to 1956. The prosent council has an annual budget of \$315,000. It is headed by Stan Austal who has four full-time staff members: a publicity man, and by Stan Austal who has four full-time staff members: a publicity man, and standard who has four full-time staff members: a publicity man, and standard who has four full-time staff members: a publicity man, and a Mrector of Program Development. Nr. Swengros is the latter.
  - indeed, until 1959 the Council's efforts involves school programs, and Fitness. Now the Council was known as the President's Council on Youth Fitness. Now the Council has a wider range of interest that includes adults and the Armed Forces. The council has worked on specific physical fitness and the Armed Forces. The council has worked on specific physical fitness and the Armed Forces, the council has worked on specific physical fitness and the Armed Forces, the council has worked on specific but with view to programs with the FAA and HEW, and would be interested but with view to the planned Agency program, not only for its own sake but with view to the planned Agency program, not only for its own sake but with view to adapting our program experience to other agencies. The FAA program is easentially a "home-type" program wherein some high of a certain group of FAA employees volunteered to follow a home exercise program.
    - 5. Mr. Swengros then described the philosophy of end the medical thinking behind the work of the President's Council. Since fifty-five thinking behind the work of the President's Council. Since fifty-five thinking behind the work of the President's Council. Since fifty-five thinking behind the work of the President's Council. Since fifty-five thinking behind the work of the President's Council. Since fifty-five thinking behind the work of the President's Council. Since fifty-five thinking behind the work of the President's Council. Since fifty-five thinking behind the work of the President's Council. Since fifty-five thinking behind the work of the President's Council. Since fifty-five thinking behind the work of the President's Council. Since fifty-five thinking behind the work of the President's Council.

in three vital physical respects:

- a. Muscular strength
- b. Muscular endurance
- c. Cardiovascular endurance

Medical science has demonstrated that regular moderate exercise is of great help in this regard. Moreover, such exercise develops the "collateral circulation" that in many cases prevents a heart attack from being fatal. Mr. Swengros explained that isometric contraction exercises are helpful toward muscular strength and endurance but are not beneficial toward improving cardiovascular endurance — which is most important for adults.

- 6. Mr. Swengros then passed out to each official present an envelope containing peophlets and brochares issued or endorsed by the Council. At Dr. Tietjen's request he submitted the following recommendations for establishing a physical Mitness program:
  - a. Get your people to play a game, hike, cycle, etc. But first you must get them in shape for this.
  - b. Organize smaller pilot groups from each component, give them some status, and have them set the example for a few months. Then ask for additional volunteers.
  - c. Form clubs through the Employees Recreation Association, e.g., "Hoon Time Jossers", that would exercise during duty hours.
  - d. Organize an off-duty exercise program wherein employees agree to follow faithfully a home exercise program. Here you must give the employees guidence but not necessarily physical exeminations.

SUMMECT: Physical Fitness Program

8. Dr. Tietjen asked if the Council advises on how an exercise facility should be used. We Swengros answered in the negative.

### STATINTL

suggested that in view of the Agency's space problem the "home exercise program" would be better for CIA.

10. Dr. Rietjen adjourned the meeting at 1530 hours by thanking Mr. Swengros and indicating that we would look into the programs of other agencies such as the IMA, and that we would meet again to discuss a specific proposal for an Agency Physical Fitness Program.
